

## San Juan Shower Enclosures

Living in San Juan, Puerto Rico brings with it many advantages that you just don't get from living anywhere else in the world. You get some of the most agreeable weather year round and plenty of beauty to behold just about any time that you step outside. Living in San Juan also provides you with many wonderful opportunities for night life, restaurants, work, and much more.

Of course, when you're thinking about getting a brand new shower enclosure for your San Juan home, you're not going to be thinking about all of the things that you can do throughout the city. What you're thinking about are the options that may be available for you and your family when it comes to the different types of shower enclosures that you could choose from.

*What to think about when it comes to shower enclosures.*

Every household is different. Just like every family and individual preference is different, what is ideal for one individual may not be so for another. For example, when it comes to shower enclosures, one person may be more concerned with just the basic functionality of the enclosure. They may have curtains right now and are tired of the mold and mildew that tends to form on them throughout the month and no matter how many times they close it after a shower, the mold begins to grow.

They may also be more concerned with safety and think that a shower enclosure may help out, as long as they find one that is safe for their loved ones, and themselves. Still, other people are concerned about privacy and even though they may know that a shower enclosure will help to boost the overall value of their home, they may not believe that you can get any type of privacy with a glass shower enclosure.

The final aspect of these considerations is false. In fact, you can get the same, if not *more* privacy, with a shower enclosure than you should with a traditional shower curtain. How is this possible? Especially with all of glass that these shower enclosures are made up from?

The answer lies in the type of glass that the homeowner would choose. If you're more concerned about privacy, then you can choose a textured and even smoky glass finish for your shower enclosure. While you may be able to see an outline or faint shape of a person in the shower, you wouldn't be able to see them in any remote detail. You could also choose a white glass shower enclosure. This would conceal the person who is in the shower.

Why would this even be important? For those people who close and lock the door when they are in the bathroom and take a shower, it wouldn't matter whether the shower enclosure that you choose was clear or obscured; you would be the only person in the shower so there would be no risk of anyone else seeing you while you were showering.

However, there are many households in San Juan, as well as throughout the world, that are busy with many family members all trying to get ready at the same time in the morning, or in the evening. For these families, especially those that have one bathroom, then time is of the essence and they understand that when one person is in the shower, then there may be another family member at the sink combing their hair or getting ready for the day.

This is when privacy is important. This is where Vista Systems can help because they have the experience and the know-how to design and deliver the perfect shower enclosure for your San Juan home that will offer you the right level of privacy as well as security.

*What about aesthetics?*

If you want your bathroom to look great and not just be solely functional, then you need a company that has a long history of experience in providing glass shower enclosures to people throughout San Juan. Vista Systems has been designing and creating some of the most breathtaking and aesthetically pleasing glass fixtures for the home and they can do the same for you.

When you think about a glass shower enclosure, it's a different thought process than considering having new windows installed in your home. However, when you invite guests over, whether they are going to spend the night or are just having fun for an afternoon or evening, they will eventually (most likely) use your bathroom, which means they will see your shower. You take pride in your San Juan home, so you don't want anything to get in the way of it looking

the best that it can be.

You clean, you keep everything organized, and you do your best to make sure that your home is in the best shape possible, which is why you want to have the right, and the best, shower enclosure installed in your home.

The shower enclosures that you can get through Vista Systems are hands down, some of the best, most sophisticated, and affordable that you'll find anywhere throughout San Juan or anywhere else in Puerto Rico. It's not enough just to say that you want to have a great looking bathroom; you need to make the investment. While the flooring is important, as is the sink and other features, the shower is one of the focal points in the entire bathroom. Even if you plan on placing the new shower enclosure on an existing tub or shower stall, make sure that it looks as good as it can. Vista Systems can highlight options and designs that you may have never thought about before.

There's no better time than now to get a brand new shower enclosure that will help you feel better about your bathroom, but could also increase the overall value of your home. When you're ready to start looking at the options that are available, contact Vista Systems today. We're ready to answer any questions that you may have with regard to shower enclosures for your San Juan home.
