

For the discerning homeowner, for the unique room, for a breathtaking approach to the kitchen, the floors, or stairway design, glass is the leading edge, new trendy material.

Glass has a high-end appearance that distinguishes them from common materials such as granite or synthetic surfaces.

Bullet Resistant

Terrorism, attempted murder, assassination, and attacks on private persons are unfortunately facts of life. Firearms play an important role when human life and tangible assets are attacked. Bullet Resistant Glass is designed to defeat all possible ammunitions.

Acoustical Glass

Acoustic glass is a perfect solution for insuring exceptional levels of sound insulation. It not only provides insulation for impact and airborne noise but also maintains the safety and security properties of laminated glass. Acoustic glass can be functional to both commercial and domestic buildings when applied to products such as windows, patio doors, skylights, conservatories and internal screens and partitions.

Privacy Glass

Privacy Glass or Smart Glass, also called smart windows or switchable windows in its application to windows or skylights, refers to electrically switchable glass or glazing which changes light transmission properties when voltage is applied. Our Privacy Glass changes from transparent to translucent, partially blocking light while maintaining a clear view of what lies behind the window. Other types of Smart Glass can provide privacy at the turn of a switch.
